

OVERLANDER

R240

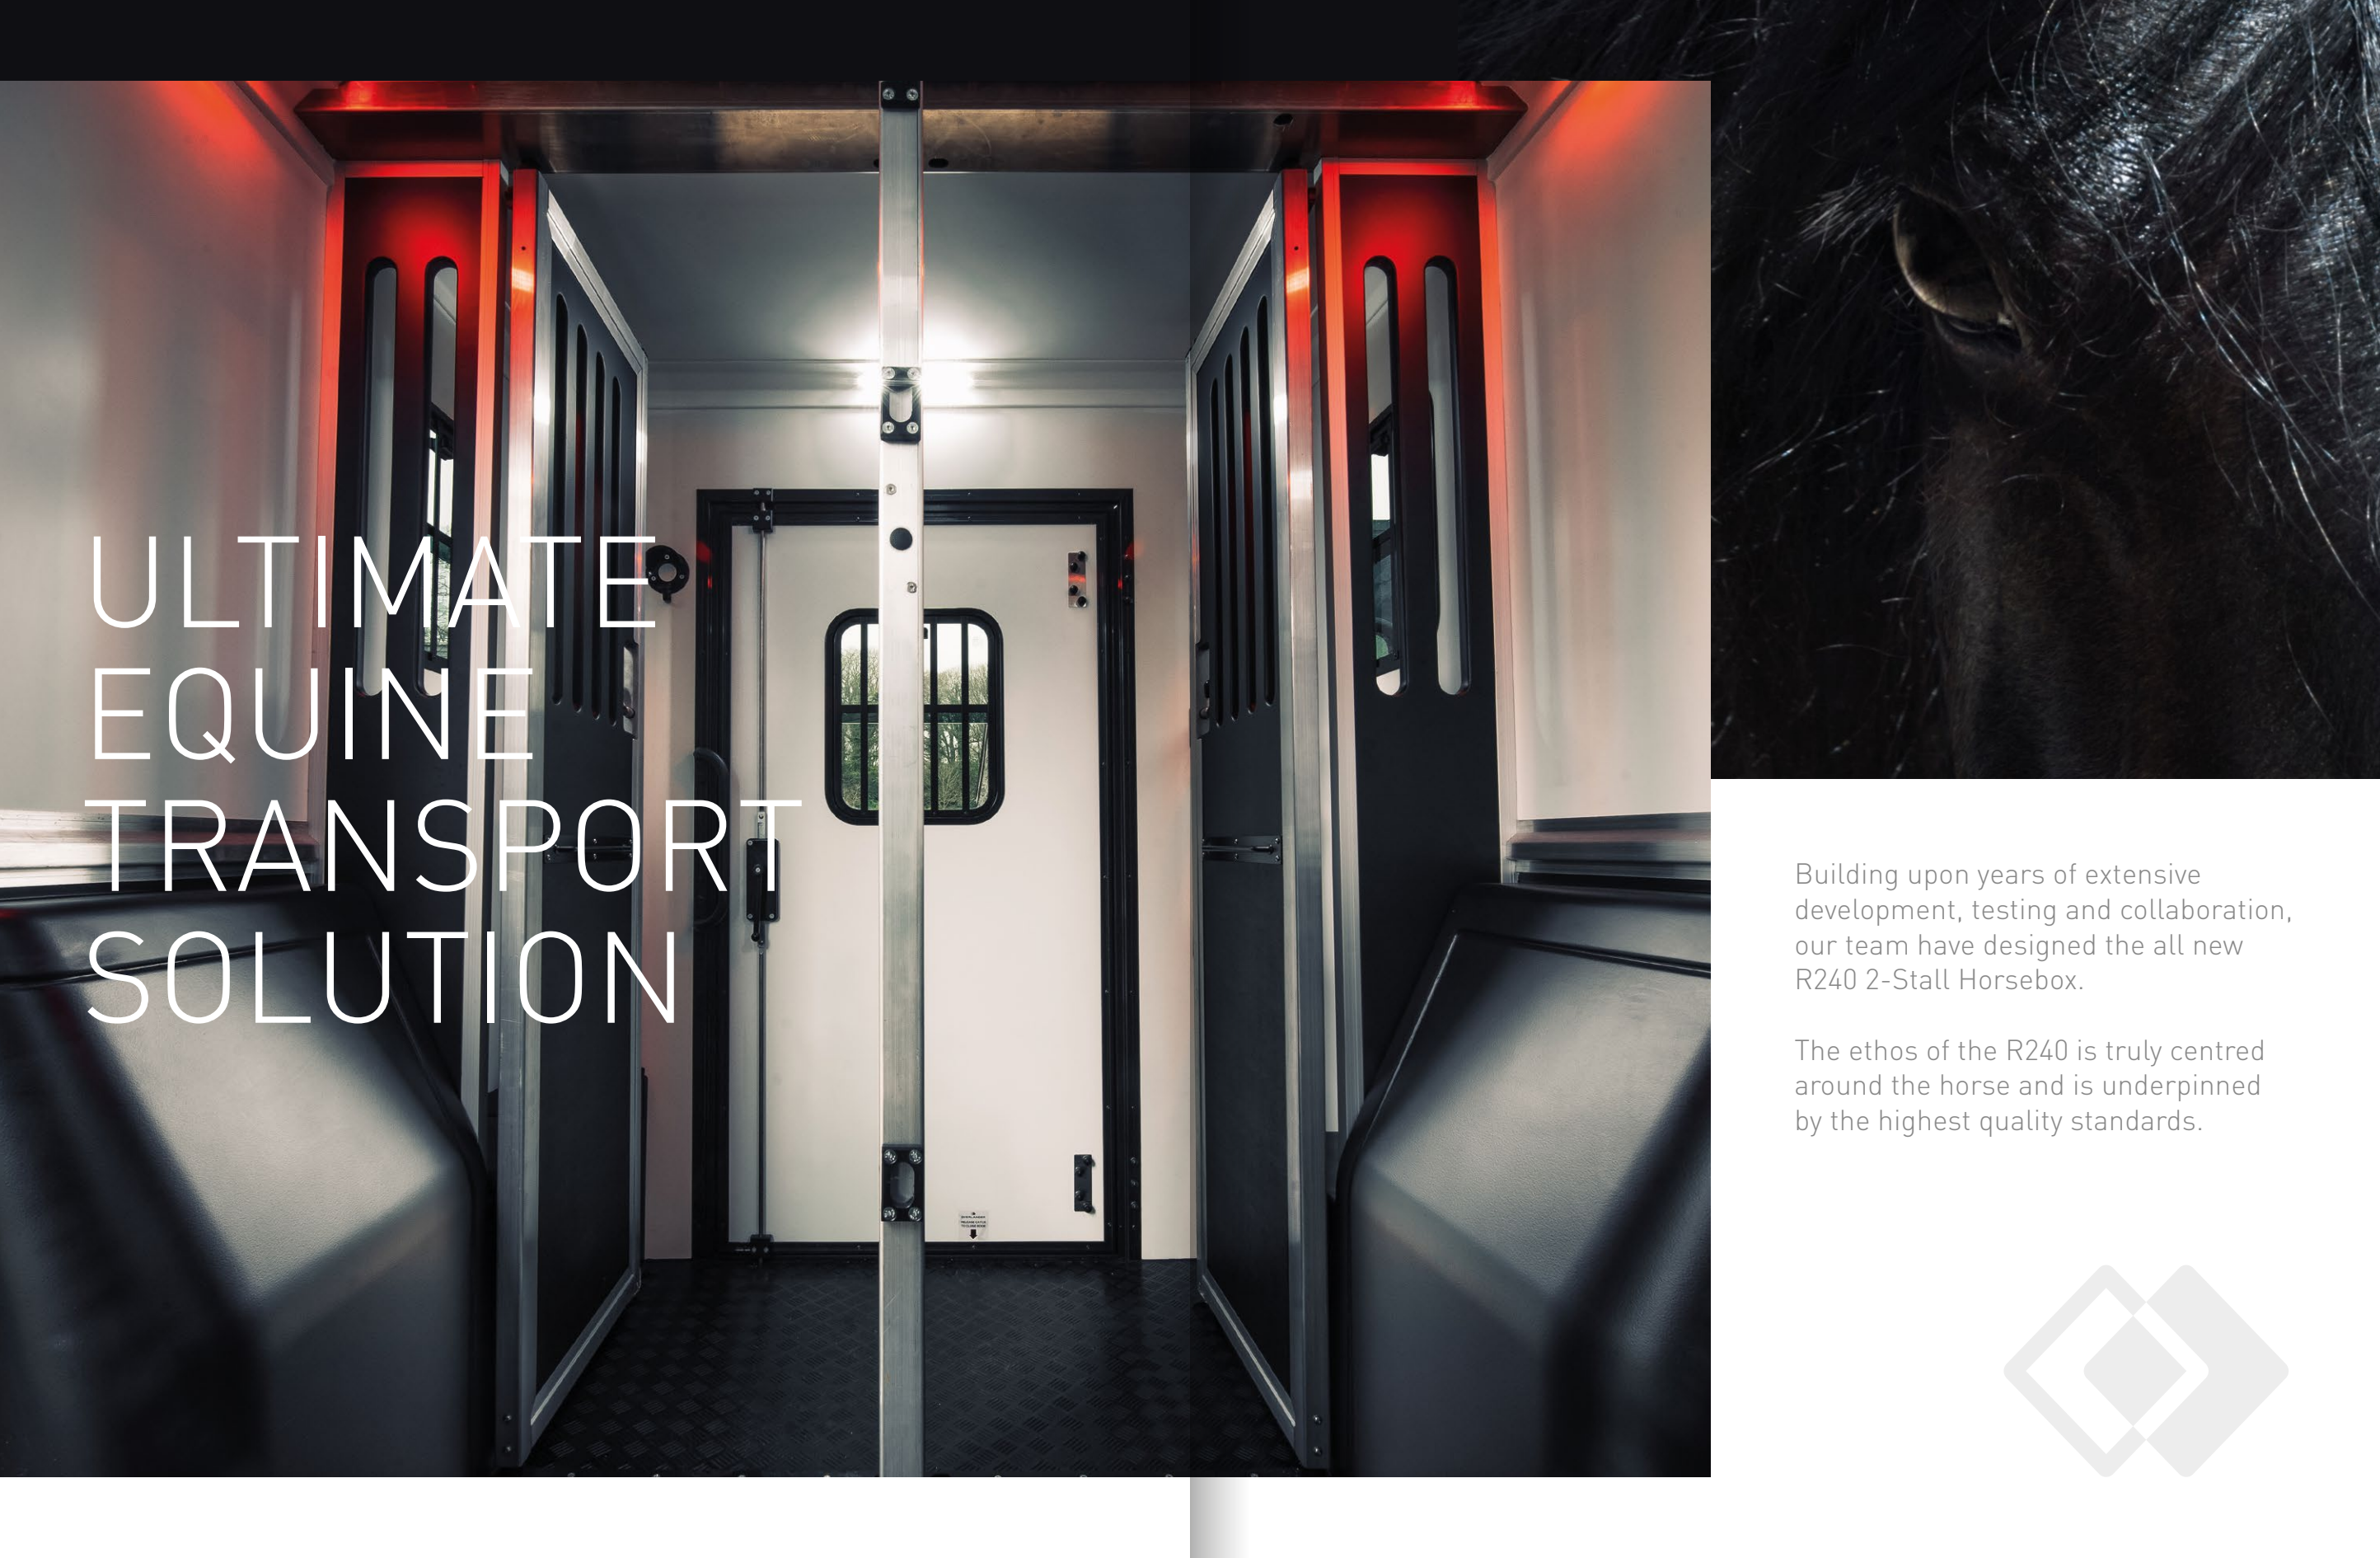

2-STALL HORSEBOX

Overlander is a leading manufacturer of specialist vehicles with an unrelenting drive to design and build a new standard of equestrian transport. The hallmark of an Overlander is that our products are built beyond. When we say 'beyond' we mean better designs, advanced materials and market leading engineering.

INTRODUCING THE **R240**

ULTIMATE EQUINE TRANSPORT SOLUTION

Building upon years of extensive development, testing and collaboration, our team have designed the all new R240 2-Stall Horsebox.

The ethos of the R240 is truly centred around the horse and is underpinned by the highest quality standards.

B U I L T

B E Y O N D

CAB

Providing excellent performance and increased efficiency, the R240 utilises a 2.0L BlueHDi diesel engine, with 6-speed manual transmission, offering 140 BHP.

With the safety of the horse at the forefront, the R240 is fitted with our approved camera monitoring system for complete peace of mind. A stepped-back bulkhead has increased cabin space for storage and improved sound absorption, maximising comfort.

GENUINE HORSEPOWER

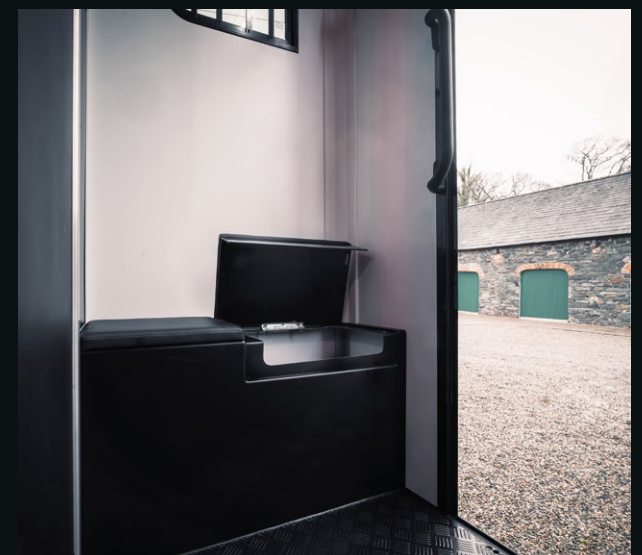

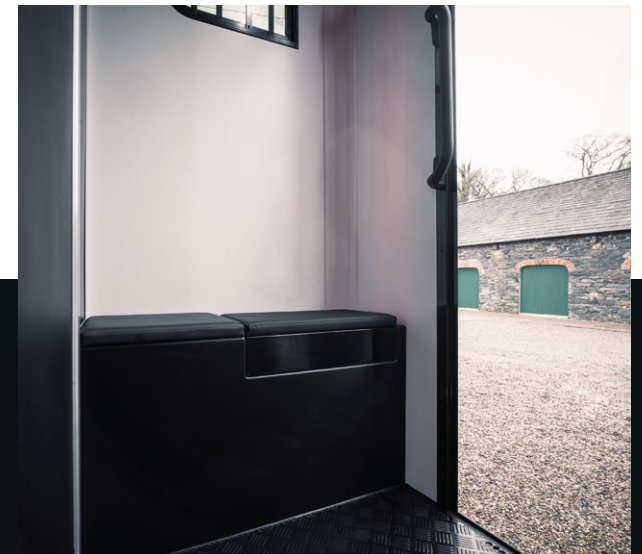

RAMP

The R240 is equipped with an advanced composite aluminium reinforced ramp door which provides increased strength without compromising the weight. The anti-slip rubber matting allows for safe and secure loading and unloading. Our in-house designed and fabricated Ramp Assist Spring permits safe and controlled opening but also assists for effortless lifting to close.

STALL SYSTEM

The long stall design separates the horses by way of a full height slotted sliding divider gate, divider door and two access partition doors, eliminating the need for a breast bar. The gates and doors have been specially designed and manufactured in-house for the R240 and all gaps and openings minimised with safety at the forefront. Produced from a reinforced core with double-skinned GRP, these components are durable, easy-clean, age-resistant and lightweight.

REAR ACCESS

The R240 has a large rear door for easy access

With a quick safe exit in emergency scenarios

Secured with industrial grade hinges + retainer hold catch

TACK AREA

The rear tack area comes standard with two Overlander folding saddle racks, 2 bridle hooks, leather cushioned seating area and fold-up storage compartment. The tack area also has ample drainage with two outlets fitted as standard.

FLOORING

The all new flooring system utilises advanced composite aluminium panels covered with our unique flex screed rubber coating. It is a high strength cushioned, seamless and completely sealed rubber flooring system specially designed for horsebox use. The R240 floor provides the comfort and strength of rubber matting in a fully sealed bonded system. The flooring is long lasting, easily repaired and with two drain outlets, this ensures that the floor is correctly maintained and designed for longevity.

PANELS

We have designed the R240 around the horse, with strength and safety being the paramount concern. The R240's tried and tested bulkhead panel has an extremely high-density core. The body panels take the form of a closed cell core composition. All body panels offer high tensile strength and durability.

VENTILATION

As standard, the R240 has five opening windows, skylight and dual intake and extraction ventilator. This provides the stalls with optimum airflow.

The ventilation system is Euro Tunnel Le Shuttle compliant and passes the required capacity regulations.

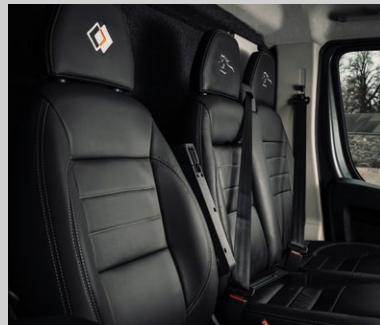

INTERNAL PROTECTION

The interior horse area sidewall is fitted with thermoplastic sheeting for protection and the bulkhead has fabric reinforced insertion rubber added for impact resistance. The roof has a bump pad installed for safety and the stall area is finished with a rub rail.

INTERIOR LIGHTING

The stall and rear tack areas are fitted with white LED lamps for safe working at night. The stall area also comes equipped with red calming lamps to ease with travel.

R240

STALL SYSTEM

An advanced sliding rail system with all gaps minimised for safety.

BODYWORK

A hybrid panel system utilising high tensile panels for increased strength and longevity. Our tried and tested bulkhead system is market leading and is designed around the horse for safety and comfort.

RAMP

Using advanced composite aluminium materials, the Overlander Ramp and Spring Assist system allows for safe loading and unloading.

BUILT BEYOND

FLOOR

The Overlander triple tier flooring design gives complete peace of mind for safe travel.

R240

STALL SYSTEM

An advanced sliding rail system with all gaps minimised for safety.

BODYWORK

A hybrid panel system utilising high tensile panels for increased strength and longevity. Our tried and tested bulkhead system is market leading and is designed around the horse for safety and comfort.

RAMP

Using advanced composite aluminium materials, the Overlander Ramp and Spring Assist system allows for safe loading and unloading.

EXTERIOR

All new exterior trim is designed for style with the front luton creating increased aerodynamics.

REVERSE CAMERA

Incorporated brake light and camera system allows for increased visibility and safety.

REAR ACCESS

Oversized door to allow for use in emergency scenarios, fitted with industrial hinges and positive hold back.

TOWBAR + STEP

Approved detachable swan neck towbar with access step and grab handle.

FLOOR

The Overlander triple tier flooring design gives complete peace of mind for safe travel.

WORLD-CLASS,
INNOVATIVE
HORSE TRANSPORT
SOLUTION

OUR PARTNERS

We are proud to partner with world-class riders and leading organisations from across the UK and Ireland. Our Premium 2-Stall Horsebox is a vital addition to all of their operations. We're delighted to be the trusted transport for our brand partners.

Overlander is delighted to partner with the world-renowned auction house, Tattersalls Ireland. The premium service that Tattersalls Ireland provides goes hand in hand with Overlander and the premium products we have on offer.

Overlander is proud to partner with the prestigious Gleneagles Equestrian School, with its team making full use of a new R240 2-Stall Horsebox in striking Gleneagles Blue. Overlander, alongside Stirling Trailer Centre, are headline sponsors for the Gleneagles Hunter Trials Championship Series.
